DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by *Zioupos et al.*, *Mechanical and optical anisotropy of bovine pericardium*, cited by applicant in parent application 09/591005.

As to **claim 1**, Zioupos discloses a system for determining the shape of inflated disks of bovine pericardium, comprising:

a substantially circular pressure port in communication with a pressurization source;
a cavity for housing and securing a portion of a tissue sample in communication with the pressure port such that the tissue is inflated to a dome shape, the height of the dome being proportional to the strength of the tissue;
a light source to illuminate the sample and create a Moire fringe pattern; and
a viewing port arranged above the tissue to view the tissue such that the degree of anisotropy may be determined (pg. 77, sec. 3 - pg. 78, sec. 3.2).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2877

Survazyan et al. (5,706,815) disclose a method and device for measuring anisotropic mechanical properties of tissue.

Sharf et al. (6,144,199) disclose a method for imaging vessel wall anatomy and strain.
